

# Final Progress Data Packet

## For 5 Year Joint Goals ending in Aug 2013

Use this data packet to help complete:

- Part I of your Local Agency Plans,
- Due November 1, 2012

## Nebraska WIC Program – Joint Goal Overview

- NE WIC previously developed 2 Joint Goals as a result of our joint planning process
- Each goal includes 2 joint strategies
- Our joint goals fall into the topic areas of:
  - over weight children
  - exclusive BF
- Both are 5 year goals, ending in August 2013
- **This is our final review**, since as our PedNSS data source will not be available for 2012 data.
- The data needed for your final review is included in this packet along with any instructions needed for calculating your percentages

# Joint Nutrition Goal

- **Topic** – Overweight Children
- **5 Year Goal:** By August 1, 2013 reduce the % of NE WIC children ages 2-4 that are at or above the 85<sup>th</sup> percentile BMI for age. (Original Baseline – 29.6%)
- **Progress Data:** 2011 LA PedNSS – Table 6F  $\geq$  2 years over-weight column

# Instructions for Locating your progress data

1. Refer to PedNSS Table 6F (next page)
2. Calculate your own LA percentage by ADDING the percentages together for the overweight & obese
  - For example, for the progress State Figures refer to the red highlighted area

(1) Reporting period is January 1 through December 31.

(2) Analyses based on one record per child.

(3) Excludes records with unknown data or errors.

(4) Rank compares this local agency's rate to other local agencies. Rank 1 = best rate.

(5) Infants born during the reporting period included in the analysis.

(6) Based on 2006 WHO growth chart percentiles for children under 2 years of age; short stature is defined as length-for-age ≤ 2.3rd percentile, underweight is defined as weight-for-length ≤ 2.3rd percentile, and high weight-for-length (labeled as "Obese") is defined as ≥ 97.7th percentile.

(7) Based on 2000 CDC growth chart percentiles for children 2 years of age and older; short stature is defined as height-for-age < 5th percentile, underweight is defined as BMI-for-age < 5th percentile, overweight is defined as BMI-for-age ≥ 85th to < 95th percentile, and obesity is defined as ≥ 95th percentile.

(8) Based on 1998 CDC MMWR, "Recommendations to Prevent and Control Iron Deficiency in the United States", altitude adjusted, children 6 months of age and older included in the analysis.

\* Percentages and ranks are not calculated if < 100 records are available for analysis after exclusions.

Calculate your LA progress percentage by adding the percentages together for 85<sup>th</sup>-95<sup>th</sup> percentile (overweigh column ) and >95<sup>th</sup> percentiles (obese column) for your LA.

LA progress (Final):

\_\_\_ + \_\_\_ = \_\_\_%

2011 State Final Progress: 16.8 + 14.3 = 31.1%

(1) Reporting period is January 1 through December 31.

(2) Analyses based on one record per child.

(3) Excludes records with unknown data or errors.

(4) Rank compares this local agency's rate to other local agencies. Rank 1 = best rate.

(5) Infants born during the reporting period included in the analysis.

(6) Based on 2006 WHO growth chart percentiles for children under 2 years of age; short stature is defined as length-for-age ≤ 2.3rd percentile, underweight is defined as weight-for-length ≤ 2.3rd percentile, and high weight-for-length (labeled as "Obese") is defined as ≥ 97.7th percentile.

(7) Based on 2000 CDC growth chart percentiles for children 2 years of age and older; short stature is defined as height-for-age < 5th percentile, underweight is defined as BMI-for-age < 5th percentile, overweight is defined as BMI-for-age ≥ 85th to < 95th percentile, and obesity is defined as ≥ 95th percentile.

(8) Based on 1998 CDC MMWR, "Recommendations to Prevent and Control Iron Deficiency in the United States", altitude adjusted, children 6 months of age and older included in the analysis.

\* Percentages and ranks are not calculated if < 100 records are available for analysis after exclusions.

This is the last time this  
report will be available.

Calculate your LA progress percentage by adding the percentages together for 85<sup>th</sup>-95<sup>th</sup> percentile (overweight column) and >95<sup>th</sup> percentiles (obese column) for your LA.

# Joint BF Goal

- **Topic** – Exclusive BF
- **5 Year Goal:** By August 1, 3013 increase the % of exclusively BF infants at 6 months of age  
(Original State Baseline: 5.3%)
- **Final Progress Data**– Exclusive BF rates from PedNSS table 7F *IS NOW available and is attached. (You may remember this data was not available last year when we completed our plans, so we used an alternate data source.)*
- Using table PedNSS 7F, locate your LA progress figure under column 7 (Exclusively BF at 6 mo.)

# Joint BF Goal: Exclusive BF
